EDUCATION

▶ **Bahirdar University**   **Sep 2012 - July 2016**

Software Engineering

Achieved a GPA of 3.83 in Bachelor of Science in Software Engineering from Bahir Dar University, demonstrating strong academic performance and understanding of software development principles

WORK EXPERIANCE

▶ **Internship**   **May 2023 - July 2023**

web developer

During my internship at ICT and Business Incubation Company, I contributed to the development of a web-based "Equb" system, a digital platform designed for traditional Ethiopian savings groups. This role allowed me to gain hands-on experience in Designing intuitive and user-friendly interfaces, Implementing secure payment solutions, Optimizing overall user experience. This project not only enhanced my skills in modernizing traditional systems but also significantly improved my problem-solving, organizational, project management, and teamwork abilities. The experience has been invaluable in advancing my professional development and in my contributions to developing innovative solutions

SKILLS

▶ **Programming Language**

Java,Javascript,

Dart,C++,Golang.

▶ **Tools**

HTML,CSS,Nodejs ,Expressjs

Reactjs,Nextjs,

Vuejs,,Nuxtjs.

▶ **Soft Skills**

Team Collaboration,Communication ,

Time managment,

Problem solving and Orginization

▶ **Languages**

Amharic,

English.

▶ Projects

Web Based mentorship System

As Final Project at Bahirdar UniversityCollaborated with a team to develop a web-based mentorship system designed to connect mentors and mentees for career development. The platform features comprehensive profiles for mentors and mentees, skill matching, and progress tracking. Mentors offer guidance through personalized learning paths, while mentees can search for mentors based on their expertise and skills. Additionally, I integrated an admin panel for efficient user management and performance monitoring, ensuring a seamless and effective mentorship experience.

▶ Experiance

Work as frontend developer Intern

As a frontend developer at Minab IT Solutions, I specialize in building and maintaining modern web applications using Vue.js and Nuxt 3. My role involves developing user-friendly interfaces and ensuring a seamless user experience through well-structured and responsive designs powered by Tailwind CSS. I work closely with backend developers and designers to create efficient and visually appealing applications. Through this experience, I have enhanced my problem-solving skills, improved performance optimization techniques, and gained valuable hands-on experience in frontend development.

CERTIFICATIONS

▶ **2023**
Fullstack and mobile app development from Minab It Solutions
